

Nuance Dragon Professional Group

Focus on business, not documentation.

Empower employees to create high-quality documentation faster and more efficiently, while saving your business time and money, with the Nuance® Dragon® Professional Group enterprise-ready speech recognition solution.

Many organizations are challenged with creating outstanding documents.

And if not completed correctly or efficiently, this can hamper report quality, employee productivity, and increase costs and compliance risks. With the Dragon Professional Group speech recognition solution, empower your staff with a faster and more accurate way to create documents, spreadsheets, and presentations, or fill out form-based reports—in the office or on the road—all by voice. Use robust transcription tools to eliminate reliance on outsourced services. Or create and share powerful voice commands to shortcut repetitive, manual processes for additional productivity gains. With a next-generation speech engine leveraging Nuance Deep Learning technology, Dragon achieves high recognition accuracy while dictating, even for users with accents or those working in open office or mobile environments. Easily deploy and centrally manage Dragon through the Nuance Management Center.

Work better, faster and smarter with accurate dictation and transcription

Speed and simplify document creation.

Don't let heavy documentation demands impact productivity, costs or client service. Employees can dictate documents 3 times faster than typing with 99% recognition accuracy, right from the first use. And since documents are created in a fraction of the time it would typically take typing by hand, they spend less time on paperwork, and more time on profitable tasks.

Streamline repetitive or manual processes.

Having to type repetitive content or perform multi-step tasks is a drain on productivity. With its powerful voice command capabilities, Dragon makes it easy to automate these tasks. For example, create custom voice commands to insert standard boilerplate text or signatures into documents. Or create time-saving macros to automate multi-step workflows by voice. Once created, share them with other Dragon users.

KEY FEATURES/BENEFITS

- **Achieve faster** documentation turnaround—in the office and on the go.
- **Enable employees** to focus on their “real job” rather than administrative work.
- **Eliminate the need** for costly transcription services or inefficient manual processes.
- **Improve** your business reputation with faster turnaround of high-quality documentation.
- **Simplify IT's job** with a solution that's easy to deploy, maintain and centrally manage.
- **Achieve** a competitive advantage and a strong ROI.

BUILT FOR TEAMS. BUILT FOR THE ENTERPRISE.

Nuance offers flexible volume licensing programs—designed to help organizations realize improved productivity at an affordable price.

Add custom words to meet your business needs.

While Dragon comes with an expansive built-in vocabulary, it can also be personalized to include the industry-specific terms or acronyms your employees use daily. Once custom words or word lists have been created and added, share them across the user community. The result: even higher dictation accuracy and faster document turnaround.

Eliminate or reduce transcription time and costs.

Reduce dependencies on outsourced transcription services, or eliminate transcription bottlenecks. Using Dragon, employees are able to transcribe recorded notes or voice files of another single speaker into text quickly and easily back at the PC. Dragon's Auto Transcribe Folder Agent (ATFA) also makes it easy to transcribe batch files of audio recordings for additional time and cost savings.

Improve mobile documentation and reporting.

Dragon's seamless synchronization across PCs, iOS and Android devices through the cloud means mobile employees or field workers can keep up with documentation from any location. Use Dragon on popular touchscreen PCs, or sync with Dragon Anywhere Group, Nuance's cloud-based, professional-grade mobile dictation solution, and complete and share work wherever business takes you.

Central user administration made easy.

The Nuance Management Center makes it easy to track employee usage of Dragon, redistribute licenses based on usage, and manage or share customizations, including custom words, commands and auto-texts, across multiple users.

About Nuance Communications, Inc.

[Nuance Communications](#) (Nuance) is a technology pioneer with market leadership in conversational AI and ambient intelligence. A full-service partner trusted by 77 percent of U.S. hospitals and 85 percent of the Fortune 100 companies worldwide, Nuance creates intuitive solutions that amplify people's ability to help others.

CITRIX® VIRTUALIZED ENVIRONMENTS

Deploy on Citrix XenApp® or Citrix XenDesktop® servers where the target application resides, enabling users to dictate from workstations that do not have Dragon installed on them.

SUPPORT FOR NUANCE POWERMIC

Take advantage of a robust, ergonomic handheld microphone with simplified thumb-control operation, programmable buttons and integrated mouse functionality.

ACCESSIBILITY AND REPORTING COMPLIANCE

With all its shared customization capabilities, Dragon can be easily adapted as needed to meet stringent compliance requirements for accessibility or industry reporting.

SYSTEM REQUIREMENTS

- Windows 7, 8, 10 (32- and 64-bit), Windows Server 2010/2013 R2, Windows Server 2016
 - RAM: Minimum 4GB
 - Free hard disk space: 8GB
 - An Internet connection for product download and automatic product activation (a quick anonymous process).
-
