Boost efficiency with command usage

With proper use of Dragon Medical One commands, more efficient documentation can be achieved over traditional keyboard and mouse interaction.

Natural Language Commands

- “Delete that” or “Scratch that”
- “Go to top”
- “Go to bottom”
- “End of sentence”
- “Undo that”
- “Insert before [word or group of words]”
- “Insert after...”
- “Select [word or group of words]”
- “Select all”

“What can I say?”

Will display the list of available voice commands

Consistent command execution

- Pause briefly before and after to separate from dictated text
- Say the exact command name
- Wait for Dragon to execute the command before dictating or using other commands

There are only two exceptions to these rules:

- **Lines** – New/ next line
- **Paragraphs** – New/ next paragraph, Paragraph
